ESTRO[®]
COLLEZIONI

ALLURE COLLECTION

Allure is the new model from Estro Collezioni, a masterpiece of craftsmanship and design that reflects a balance between classicism and modernity, offering timeless elegance. With its linear and bold design, the **Allure** model represents elegance embodied in the very name that evokes charm and allure. Designed with abstract geometric movements milled into the wood, **Allure** harmoniously matches the refined marble basin and top, accompanying the cabinet design with the natural veins of the stone, creating an atmosphere of sophisticated elegance.

This gives the furniture a unique textured surface, and a touch of the warmth of wood combined with the freshness of stone.

GRACE COLLECTION

Model **Grace** defines the essence of contemporary design, distinguished by a refined, minimalist aesthetic. Featuring a linear silhouette and precise angles cut at 45 degrees, this creation embodies geometric perfection, infusing an aura of sophisticated elegance into any modern bathroom. The drawer, a key element in the ensemble, blends harmoniously with the front of the cabinet, almost suspended in design. Framed by a sleek metal surround, the drawer features a sophisticated design that skillfully combines functionality and aesthetics. The drawer detail not only highlights the drawer but also fortifies the contemporary and homogeneous identity of the **Grace** cabinet. **Grace** is a masterpiece that stands at the center of the Estro collection, offering an impeccable fusion of immortal aesthetics and contemporary innovation.

L'AURE COLLECTION

L'Aure carries forward Estro's philosophy that bathroom furniture is a piece of decorative furniture. The essence of the L'Aure collection is in the balance between material and form, between volumes that overlap but always maintain a distance between them as if they were suspended. The simplicity and sophistication of this model make it very flexible in compositions making L'Aure a product with a variety of volumetric and therefore functional combinations.

REVIVAL COLLECTION

Revival expresses Estro's way of inspecting the balance between matter and form, amidst minimal and décor language. Heterogeneous materials such as wood, marble and steel alternate in a light composition with 3D surfaces used as an accent. The metal handles describe the space around the console, emphasizing the form and incorporating functionality.

SCRIGNO COLLECTION

Created with exclusive attention to detail, SCRIGNO is Estro's 'Jewellery Box', and like in every Jewellery Box, it is all about its doors.

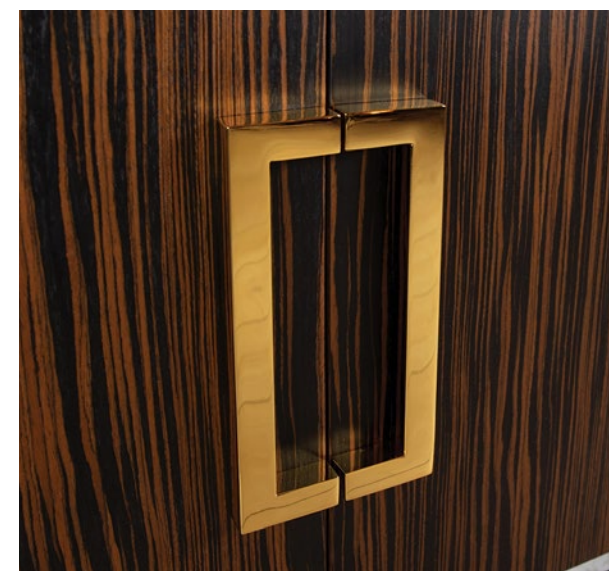

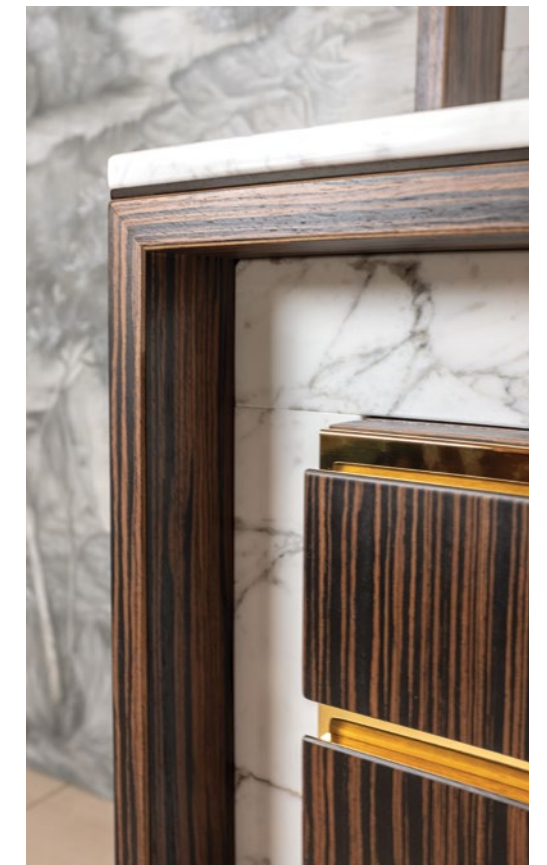

Scrigno is a perfectly symmetrical design, available in two possible solutions, floor-mounted and wall-mounted. SCRIGNO has a central metal insert available in different Estro finishes such as brushed and polished bronze, brass, and nickel. On both sides of the central metal band, two finely crafted wooden doors stand out. The marble top completes the cabinet. Scrigno has all the character to be the perfect vanity for any residential and hospitality restroom. It has the essentials to be a timeless piece.

FRAME COLLECTION

Frame is an element that Estro has created to glorify one of the most beautiful materials that Mother Nature has created, Marble.

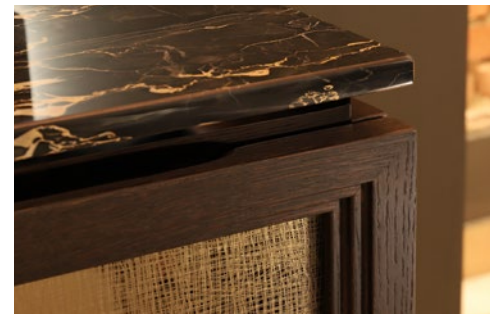

With the same attention to detail and the passion of an old-school craftsman, ESTRO has chosen numerous types of marble to suit the style of the V9 collection. With FRAME we wanted to enclose and protect the marble in a precious wood and metal case and make it stand out with a dedicated internal lighting system.

MAXIME COLLECTION

Maxime is designed transparent and flexible with a focus on optimizing modularity. Its doors are finely crafted with a solid wood structure available in multiple finishes.

Transparency comes to life thanks to the inner part of the shutters which are available in a range of glass and decorative mirrors. The marble top completes the aesthetic balance.

GIOTTO COLLECTION

A flawless marble countertop available in multiple sizes, reminiscent of modernity and industrial design, is paired with beautifully handcrafted 3D clean-cut drawers with a fluid design, available in multiple sizes and modules, a combination synonymous with dynamism plus innovation. The central door incorporating a perfect engraved circle gives Giotto a unique and unforgettable character.

Giotto is a very ductile model that adapts to different types of spaces and needs. The central door is the fixed element that evolves the modularity and versatility of the furniture.

BISHOP COLLECTION

Bishop is designed to combine modern styling with an aura of elegance and refinement, employing sharp profiles and figures for this unique bathroom vanity. Bishop features clean lines for a cosmopolitan appeal in our V.9 collection, ideally fit for any modern, sophisticated interior. The glass or mirror doors are available in a wide range of finishes and colours, from matte to glossy lacquers in trendy shades: they will render your bathroom interiors uniquely personal.

GRAVITY COLLECTION

The solidity of the marble, the sharpness of the brass and the warmth of the walnut wood are precisely combined in Gravity. The real particularity of this piece is hidden in its architecture. The 'interrupted' metal structure creates a perceptive contrast on the suspension of the piece of furniture which remains very solid thanks to its internal architecture.

LEYA COLLECTION

Leya is a vanity blessed with soft, feminine, and delicate shapes.

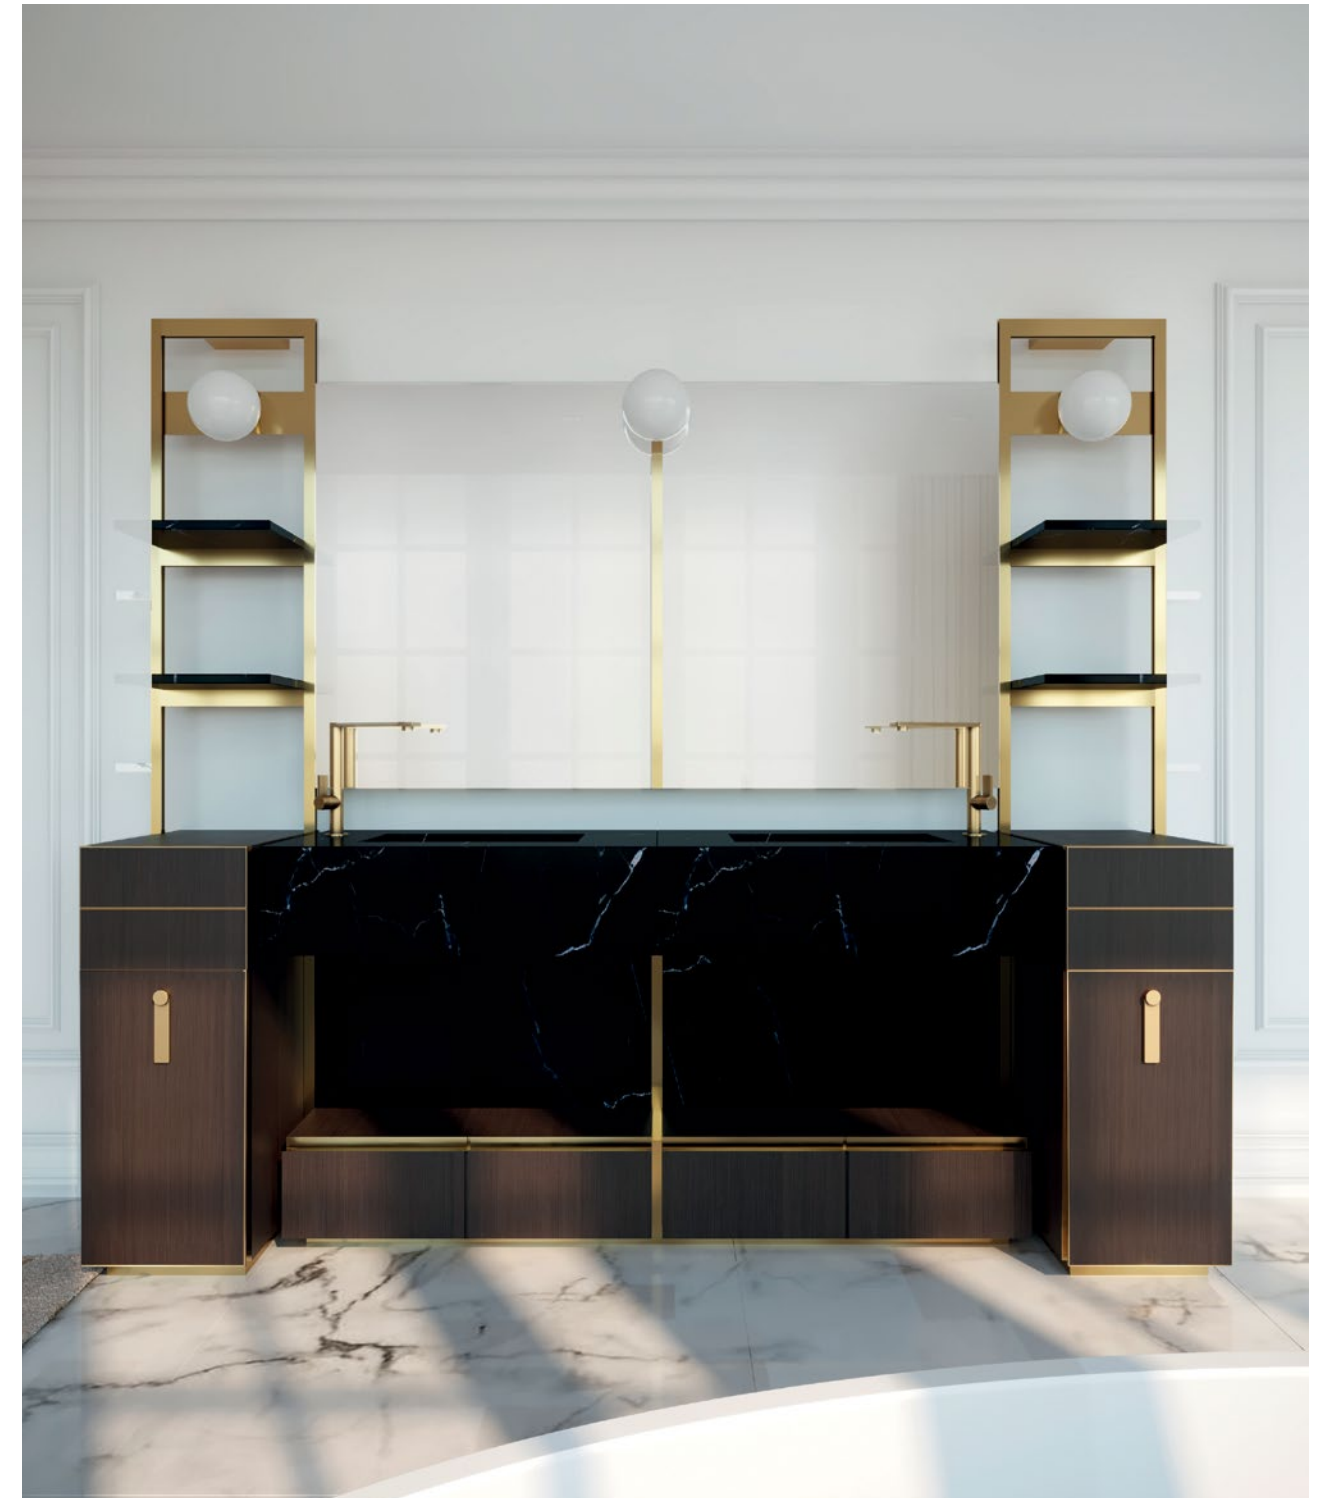

The edges and forms are designed around the concept of a cabinet with a character that blends well in many bathroom and wellness interiors. Leya is a wall-mounted unit with a precisely symmetrical design, beautifully balanced by two Main drawers, previously finished by metallic half-moon knobs. The unit revolves around the skilfully carved marble top, accommodating six 'secret drawers carefully lined with metallic inserts. Leya's handcrafted wooden elements will be available in several options of veneers, unique water-resistant laminates, and lacquered finishes. Leya is the beautiful, precious jewel of a furniture piece still missing in your home.

SATURNO COLLECTION

Saturno was born from the idea of framing two geometries together, like a planet and its rings.

The design goal, in this case, floats around crisp, clean shapes, elaborated with precious metal frames surrounding spherical light fixtures. Saturno is a wall-mounted or freestanding washbasin, available in different combinations of materials and in three standard sizes, with a single or double basins. In Saturno metal, wood and marble coexist in a delicate balance, making this piece of furniture a unique protagonist of the space.

SEBASTIAN COLLECTION

There are nine vanities in our collection: Sebastian is the soul and vision of Estro.

Estro dares to change the paradigm of a classic bathroom aesthetic: elements flash a revolutionary twist in style while preserving full functionality. All revolves around the central doors, a skilfully carved marble circle, framed by magnificently handcrafted metal profiles.

The soft edges of the structure are perfectly crafted and available in many veneers and lacquered finishes. Sebastian is the main character in the space, a piece harmoniously combining glamour and convenience.

ESTRO's COMPLEMENTS

Naturally, then, the Estro Collezioni Living Collection is an evolution of the established V9 Collection. The most iconic models of the V9 collection has been re-interpreted to serve different areas of the living space. In addition to that, a series of seating designs have been introduced to offer a wide range of choices.
